

Microblading Aftercare Instructions

FOR THE FIRST 24 HOURS:

- Keep your eyebrows dry by dabbing them with a clean paper towel.

AFTER 24 HOURS:

- Gently clean the treated area daily with mild warm water and a non-alcohol-based soap then gently blot to dry. Do not scrub, rub, wipe, or scratch the treated area.
- Apply a thin layer of ointment twice a day until you no longer have scabs.

FOR THE FIRST 14 DAYS:

- Do not wear makeup or apply any products other than the supplied ointment on the treated area.
- Do not pick, peel, rub, or scratch the treated area. Allow it to heal naturally.
- Gently cleanse your eyebrow daily with an approved permanent makeup cleanser.
- If you have oily or combination skin then you should be using blotting pads to soak up excess oil. This will help your eyebrows heal with more color.

FOR THE FIRST 28 DAYS:

- Do not use a swimming pool, hot tub, sauna, or jacuzzi.
- Avoid sun exposure and tanning beds.
- Allergic Reaction or Infection: It is rare, but there is a chance of allergic reaction or infection. At any time you are uncomfortable please visit your physician for further information.

ONCE HEALED:

- Avoid hot steam showers as they can cause dehydrated skin and inflammation/cellular breakdown.
- After the healing period, always use a sunblock or a lip balm with SPF to protect from sun fading.
